Generating Ideas for Enhanced integration

Audience members share examples of how theory, research, and practice might be integrated

1. An example of how you might integrate theory and research into your work
2. Consider one small change you could reasonably make in your work that would allow you to communicate with those outside of your typical work zone.
3. Issues you commonly address in your work that you do not see as addressed by theory
4. Practitioners, consider an intervention you use (or would like to) but wonder if there is research evidence to support it with your clients.

What is one action step you might take to further integrate theory, research, and practice in your role or current setting?
