This bibliography contains citations about the cognitive information processing (CIP) approach to career development and career services developed at Florida State University. This application of cognitive information processing theory attempts to integrate theory and practice in order to improve the design and delivery of career services for individuals in educational and related human service settings. The bibliography is organized in terms of general principles, foundations of the CIP approach, comparative theoretical perspectives, CIP research, dysfunctional career thoughts research, CIP applications, Career Thoughts Inventory, additional assessment and intervention resources, materials for client use, training materials, CIP reviews, CTI reviews, and CTI on the Internet. For additional information, contact any of the authors at the address listed above.
